

Project Initialization and Planning Phase

Date	5 July 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Manual credit card approval is time-consuming and may result in inconsistent decisions. This project uses Machine Learning to predict whether a credit card application will be approved based on applicant information, enabling faster and more accurate decision-making.

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A customer applying for a credit card.	Get my credit card application approved	I don't know whether I meet the bank's eligibility criteria	Banks consider factors like income, employment, education, and credit history before approval.	Uncertain about whether my application will be approved
