

Technology Stack

Date	5 July 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	2 Marks

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	HTML, CSS, JavaScript	<i>Creates a responsive and user-friendly interface for entering applicant details, viewing prediction results, prediction history, and dashboard analytics.</i>
2	Backend / Server-Side	Python, Flask	<i>Handles user requests, processes applicant information, executes the machine learning model, stores prediction history, and returns prediction results.</i>
3	Database / Data Storage	CSV Dataset / SQLite	<i>CSV files are used for training the machine learning model, while SQLite stores applicant prediction history, confidence scores, and prediction date and time.</i>
4	Cloud / Hosting / Deployment	IBM Cloud	<i>Deploys the web application for online access, scalability, and remote accessibility.</i>

5	Version Control & CI/CD	<i>GitHub</i>	<i>Maintains source code, tracks project versions, and enables collaboration among team members.</i>
6	Third-Party APIs / Other Tools	<i>Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn</i>	<i>Used for data preprocessing, machine learning model development, data visualization, model serialization, evaluation, and analytics.</i>
