

Demonstration of Proposed Features

Date	5 July 2026
Team ID	
Project Name	Credit Card Approval Prediction System
Maximum Marks	1 Mark

Demonstration of Proposed Features:

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Applicant Data Input	Collects applicant details through the web form.	Implemented	Yes	Working correctly
2	Data Preprocessing	Cleans and transforms applicant data for prediction	Implemented	Yes	Successfully tested
3	Data Visualization	Displays dataset patterns using count and distribution plots	Implemented	Yes	Charts generated
4	Machine Learning Model Training	Trains classification models using the credit card dataset	Implemented	Yes	Models trained
5	Credit Card Approval Prediction	Predicts whether the application is approved or rejected.	Implemented	Yes	Accurate prediction
6	Result Display	Displays the approval or rejection result on the Flask web page	Implemented	Yes	Result Displayed successfully
7	User Authentication	Allows users to securely log in before accessing the system.	Implemented	Yes	Login Working successfully

8	Dashboard Analytics	Displays total predictions, approvals, rejections, approval rate, and average confidence.	Implemented	Yes	Dashboard functioning correctly
9	Credit Card Approval Prediction	Displays the confidence percentage of each prediction.	Implemented	Yes	Confidence displayed correctly
10	SQLite Database Integration	Stores applicant prediction records in the SQLite database.	Implemented	Yes	Data saved successfully

Feature Implementation Summary:

ITEM	VALUE
Total Features Proposed	10
Total Features Implemented	10
Total Features Demonstrated	10
Overall Implementation Rate (%)	100%
